NWSLubbock

weather.gov/lub

Severe weather will be possible once again today. Storms will bring the potential for large hail, damaging winds, localized flooding, and a low chance for tornadoes.

Hazardous Weather

Temperature drop while storm chances rise

Severe storms and very heavy rainfall will be possible Saturday aftn/evening

Weather Forecast Office
Lubbock, TX
Issued Jun 25, 2021 2:28 PM CDT

A cold front will move through the area today and become quasi-stationary. Where the boundary ends up will determine where below normal temperatures are (north of boundary) and where near normal temperatures are (south of boundary). Showers and thunderstorms will form along the boundary this afternoon, bringing the potential for large hail, damaging winds, flash flooding, and tornadoes.

Severe Weather Outlook

This afternoon and evening

Weather Forecast Office
Midland/Odessa, TX
Issued June 26, 2021 4:10 AM CT

There is a slight risk for severe thunderstorms this evening across the northern half of the Permian Basin and a Marginal risk across the remainder of the Permian Basin and much of southeast New Mexico. Any storm that develops in the highlighted area will be capable of producing damaging winds, and isolated large hail.

Hazardous Weather

Severe Weather Outlook

This Afternoon and Tonight

Weather Forecast Office
San Angelo, TX
Issued Jun 26, 2021 4:33 AM CDT

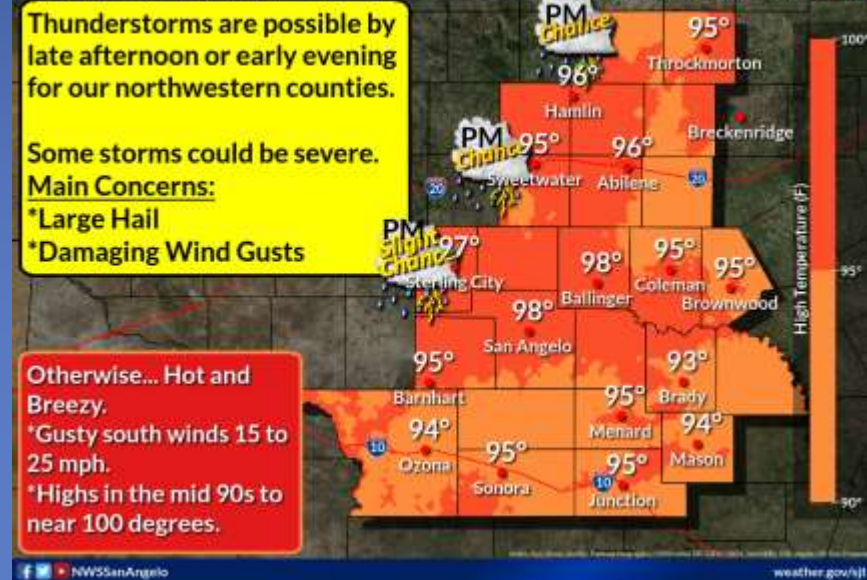

A few severe storms will be possible later this afternoon and tonight for areas mainly north of a Sterling City to Abilene to Albany line. Large hail and damaging winds will be the main concerns.

Today

Continued Hot. Chance for storms Late

Weather Forecast Office
San Angelo, TX
Issued Jun 26, 2021 3:45 AM CDT

It'll be another hot day across the area, but there is a chance for thunderstorms late in the afternoon, and into the evening hours, especially north of a Barnhart to San Angelo to Coleman line.

Hazardous Weather

Tonight

Warm, Muggy, Storms likely north

Thunderstorms may move into the Big Country and northern Concho Valley Tonight.

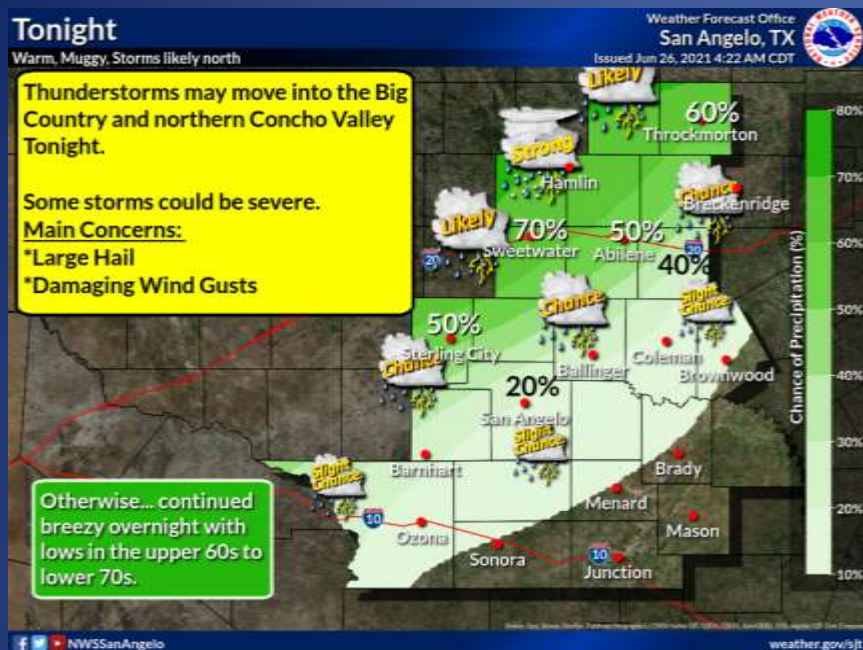

Some storms could be severe.

Main Concerns:

*Large Hail

*Damaging Wind Gusts

Otherwise... continued breezy overnight with lows in the upper 60s to lower 70s.

Thunderstorms are expected to move into the Big Country and potentially northern Concho Valley tonight. Some of the storms could be strong to severe with large hail and damaging winds being the main concerns.

Today: Seasonably Hot and Breezy

Low Storm Chances Southeast

Afternoon high temperatures will be within a few degrees of normal, mostly in the mid 90s.

There will be a southerly breeze of 10-20 mph with some higher gusts.

A few showers or an isolated storm may drift into our southeastern counties during the afternoon.

Afternoon high temperatures will be within a few degrees of normal, mostly in the mid 90s. There will be a southerly breeze of 10-20 mph with some higher gusts. A few showers or an isolated storm may drift into our southeastern counties during the afternoon.

Hazardous Weather

This Evening & Tonight: Storm Chances Northwest

Weather Forecast Office
Fort Worth, TX

Issued Jun 26, 2021 3:25 AM CDT

Scattered showers and thunderstorms may move into the area from the northwest this evening and tonight.

The chance for severe thunderstorms is low, but a few may be able to produce strong wind gusts.

Overnight lows (shown) will be in the 70s.

NWS Fort Worth

weather.gov/fortworth

Scattered showers and thunderstorms may move into the area from the northwest this evening and tonight. The chance for severe thunderstorms is low, but a few may be able to produce strong wind gusts. Overnight lows will be in the 70s.

Increasing Rain Chances Through the Weekend

Saturday

Sunday

Monday

NATIONAL WEATHER SERVICE
Houston/Galveston

Issued: 6/25/2021 3:36 PM

Hot start to the weekend with only a few showers and thunderstorms. Sunday the pattern changes and deeper tropical moisture arrives as an upper level disturbance moves into the region from the east. Scattered to numerous showers and thunderstorms on tap for Sunday.

Hazardous Weather

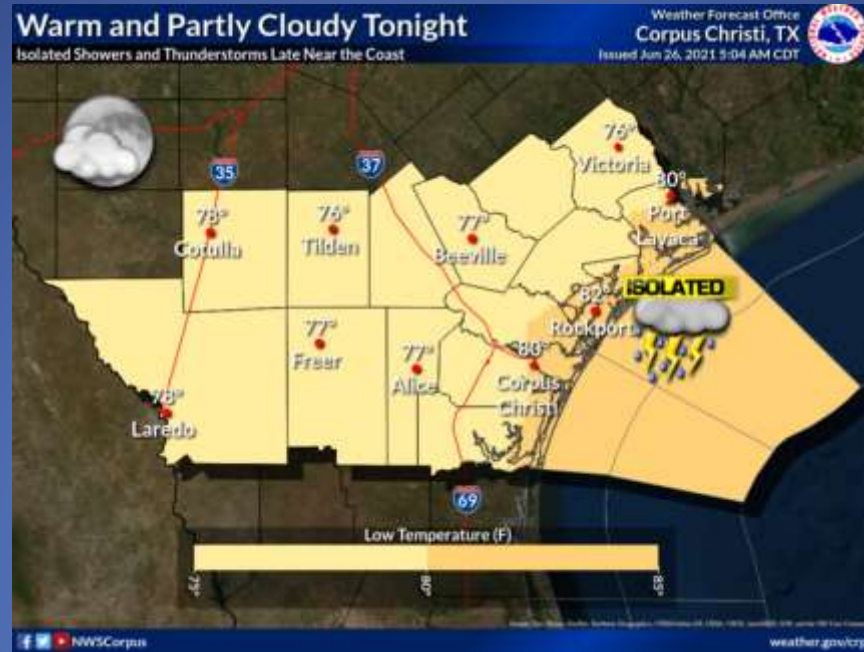

Showers and thunderstorms will develop throughout the morning and into the afternoon as the sea breeze front moves inland. Highs will be 85 to 90 with southeast winds 5 to 10 mph.

Showers and thunderstorms will diminish during the evening hours leaving partly cloudy skies. Lows will be in the 70s with light southeast winds.

Hazardous Weather

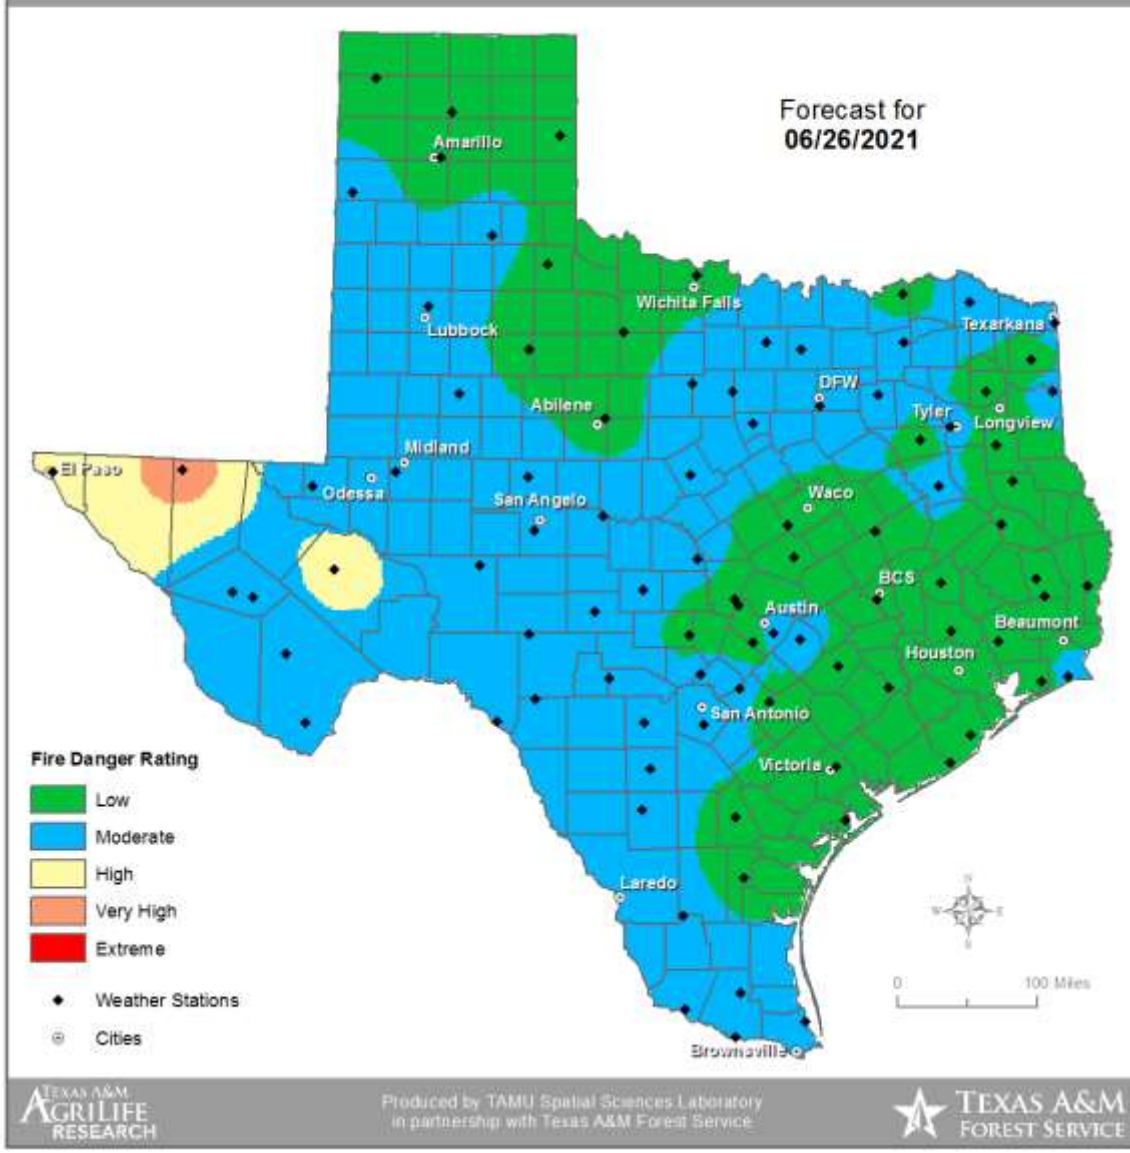

Expect partly cloudy skies and very warm lows in the 70s and lower 80s tonight. Isolated showers and thunderstorms are possible near the coast after midnight.
